A small satellite, miniaturized satellite, or smallsat is a satellite of low mass and size, usually under 500 kg (1,100 lb). While all such satellites can be referred to as "small", different

# Read Free Micro Satellite

Configurations  
are used to  
categorize them  
based on  
mass. Satellites  
can be built  
small to reduce  
the large  
economic cost of  
launch vehicles  
and the costs  
associated with  
construction.
