contributors to this volume are enthusiastic about the possibilities created by digital technologies, they also see the new media raising serious critical issues that force us to reexamine basic notions about rhetoric, reading, and the nature of discourse itself.

How digital visual effects in film can be used to support storytelling: a guide for scriptwriters and students. Computer-generated effects are often blamed for bad Hollywood movies. Yet when a critic complains that "technology swamps storytelling" (in a review of *Van Helsing*, calling it "an example of everything that is wrong with Hollywood computer-generated effects movies"), it says more about the weakness of the story than the strength of the technology. In *Digital*

Storytelling, Shilo McClean shows how digital visual effects can be a tool of storytelling in film, adding narrative power as do sound, color, and "experimental" camera angles—other innovative film technologies that were once criticized for being distractions from the story. It is time, she says, to rethink the function of digital visual effects. Effects artists say—contrary to the critics—that effects always derive from story. Digital effects are a part of production, not post-production; they are becoming part of the story development process. Digital Storytelling is grounded in filmmaking, the scriptwriting process in particular. McClean considers crucial questions about digital visual effects—whether they undermine classical storytelling structure, if they always call attention to themselves, whether their use is limited to certain genres—and

looks at contemporary films (including a chapter-long analysis of Steven Spielberg's use of computer-generated effects) and contemporary film theory to find the answers. McClean argues that to consider digital visual effects as simply contributing the "wow" factor underestimates them. They are, she writes, the legitimate inheritors of film storycraft.

As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements-from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing-web sites, presentation

"slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of *Writing New Media* bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.
