how derivatives are used by different job functions (portfolio managers, traders and others): In volatile markets; If interest rates are expected to change; When buying and selling stocks

Module I Financial Derivatives An Introduction Forward
Financial derivatives, as mentioned above, are contracts that base their value on an underlying asset. In them, the seller of the contract does not necessarily have to own the asset, but can give the necessary money to the buyer for it to acquire it or give the buyer another derivative contract. These financial derivatives are used to hedge investments and to speculate.
