Microbial pollution

Online Library

Mold

is a key element of indoor air pollution.

It is caused by hundreds of species of bacteria and fungi, in particular filamentous fungi (mould), growing indoors when sufficient moisture is available. This document provides a comprehensive

Online Library

Mold

review of the scientific evidence on health problems associated with building moisture and biological agents. The review concludes that the most important effects are increased prevalences of respiratory symptoms,

Online Library

Mold

allergies and asthma as well as perturbation of the immunological system. The document also summarizes the available information on the conditions that determine the presence of mould and measures to control their

Online Library

Mold

growth indoors.

WHO guidelines for protecting public health are

formulated on the basis of the review.

The most important means for avoiding adverse health effects is the prevention (or minimization) of persistent
