Antologia Ufficiale Di Racconti Ispirati Alla Multiversum Saga

A spellbinding adventure and a captivating tale of first love. Alex and Jenny are sixteen. He lives in Milan; she, in Melbourne. For the past four years, they have glimpsed each other at random moments, while they are both unconscious — a telepathic communication that occurs without warning. During one of these episodes, they manage to arrange a meeting. But on the day, though they are standing in the same place at the same time, each of them cannot see the other. This leads them to a startling discovery: they live in different dimensions. In Jenny’s world, Alex is someone else. And in Alex’s world, Jenny died at the age of six. As they try to find each other, the Multiverse threatens to implode and disappear, but Jenny and Alex must meet — the future of the Earth depends on it.

She was a girl, standing in front of a boy... Movie fanatic Scarlett O'Brien dreams of a life as glamorous and romantic as all the big screen flicks she worships. When a chance house-sitting job in iconic Notting Hill comes along, she knows living in one of her favorite movie settings is an opportunity too good to pass up. Leaving behind her skeptical friends, family, and fiancée, Scarlett heads to London and finds herself thrust into the lead role of her very own romantic comedy. But can real life ever be just like the movies? Larger-than-life new friends, a handsome but irksome new neighbor, and a mystery from her past may prove to Scarlett that living her life like a RomCom is more complicated than she thought! "Sparkly, fun, and endearing."—Kate Florde "This romantic comedy is the perfect way to pass a winter afternoon should Johnny Depp be unavailable."—Daily Record

It's summer in the small seaport town of Astoria and The Goonies are restless. Big developers threaten to take over the town. Then Mikey finds an old pirate map and the kids take off to find the loot that can save their neighborhood. But they never counted on skeletons with swords, a booby-trapped underground passage and the murderous ex-con, all of whom want the Goonies' head. Take the oath. Join the adventure.

The passions have long been condemned as a creator of disturbance and purveyor of the temporary loss of reason, but as Remo Bodei argues in Geometry of the Passions, we must abandon the perception that order and disorder are in a constant state of collision. By means of a theoretical and historical analysis, Bodei interprets the relationship between passion and reason as a conflict between two complementary logics. Geometry of the Passions investigates the paradoxical conflict-collaboration between passions and reason, and between individual and political projects. Tracing the roles passion and reason have played throughout history, including in the political agendas of Descartes, Hobbes, and the French Jacobins, Geometry of the Passions reveals how passion and reason may be used as a vehicle for affirmation rather than self-enslavement.

First published in 1990, this book is a comprehensive study of Gramsci's Quaderni, and gives the reader a penetrating account of the structure of Gramsci's thought. The author draw on many materials and sources, making accessible to the English-speaking reader a wide range of texts otherwise only available in Italian, French, Spanish, and Catalan. His book sheds light on Gramsci's basic philosophical and methodological principles, and will be useful as an introduction to Gramsci for students of political science, sociology, social science, history, and philosophy, as well as to scholars in the field.

Destiny and darkness collide in this romantic, sweeping new fantasy series from New York Times bestselling author Sophie Jordan, perfect for fans of Sarah J. Maas and Leigh Bardugo. Seventeen years ago, an eclipse cloaked the kingdom of Relhok in perpetual darkness. In the chaos, an evil chancellor murdered the king and queen and seized their throne. Luna, Relhok's lost princess, has been hiding in a tower ever since. Luna's survival depends on the world believing she is dead. But that doesn't stop Luna from wanting more. When she meets Fowler, a mysterious archer braving the woods outside her tower, Luna is drawn to him despite the risk. When the tower is attacked, Luna and Fowler escape together. But this world of darkness is more treacherous than Luna ever realized. With every threat stacked against them, Luna and Fowler find solace in each other. But with secrets still unspoken between them, falling in love might be their most dangerous journey yet.

This reader provides a selection of articles and essays by leading figures in the postmodernism debate.

"This middle grade series starter is tailor-made for Harry Potter's fans." —Kirkus Reviews
For fans of the Land of Stories and the Wings of Fire Series, this first enchanting adventure from acclaimed novelist Scarlett Thomas is set in a wondrous realm where magic most decidedly exists, a growing evil lurks, and a group of children is destined to save the world. Effie Truelove believes in magic, as does her grandfather Griffin (although he refuses to do any magic, let alone teach Effie how to use it). After a mysterious incident leaves Griffin close to death, Effie is given an unusual silver ring and told she must look after her grandfather’s library of rare and powerful books. But then the books fall into the hands of shady scholar Leonard Levar, and Effie is propelled into the most dangerous adventure of her life. Now, Effie and her friends—nerdy Maximilian, rugby-mad Wolf, helpful Lexy, and eccentric Raven—must discover their true powers if they are to get the books back. And Effie alone will have to travel to the Otherworld, where she will uncover the true meaning of the strange old book called Dragon’s Green...

The eighteenth-century Venetian painter Giambattista Tiepolo spent his life executing commissions in churches, palaces, and villas, often covering vast ceilings like those at the Würzburg Residenz in Germany and the Royal Palace in Madrid with frescoes that are among the glories of Western art. The life of an epoch swirled around him—but though his contemporaries appreciated and admired him, they failed to understand him. Few have even attempted to tackle Tiepolo’s series of thirty-three bizarre and haunting etchings, the Capricci and the Scherzi, but Roberto Calasso rises to the challenge, interpreting them as chapters in a dark narrative that contains the secret of Tiepolo’s art. Blooming ephebes, female Satyrs, Oriental sages, owls, snakes: we will find them all, as well as Punchinello and Death, within the pages of this book, along with Venus, Time, Moses, numerous angels, Cleopatra, and Beatrice of Burgundy—a motley company always on the go. Calasso makes clear that Tiepolo was more than a dazzling intermezzo in the history of painting. Rather, he represented a particular way of meeting the challenge of form: endowed with a fluid, seemingly effortless style, Tiepolo was the last incarnation of that peculiar Italian virtue sprezzatura, the art of not seeming artful.

This two-volume compendium brings together leading scholars from around the world who provide authoritative studies of the old and new epistemic motifs and theoretical strands that have characterized the interdisciplinary field of comparative and international education in the last 50 years. It analyses the shifting agendas of scholarly research, the different intellectual and ideological perspectives and the changing methodological approaches used to examine and interpret education and pedagogy across different political formations, societies and cultures.
