Nakamichi AV-10 Electronic Engineering. The Nakamichi AV-10 electronic engineering is very similar to that of the AV-8. Apart from the extra transformer and ICs in the digital board, everything else appears to be the same. It has the same audio switch ICs, microcontroller, and standby system. In comparison to other amplifiers, I thought the design had much room for improvement.

The Nakamichi AV-10 requires regular servicing, because the cooling fan can collect dust inside the amplifier and heatsink assembly. If the dust clogs the heatsink, then the flow of air will reduce resulting in overheating. This could result in damage to other sensitive components nearby. I bought this pre-used one on eBay and as you can see, it had never been serviced, resulting in heat marks even on the inside of the top metal cover.
