Nutrient timing involves eating foods at strategic times in order to achieve certain outcomes. It's supposedly very important for muscle growth, sports performance and fat loss. If you've ever...

[Does Nutrient Timing Matter? A Critical Look](#)

Basic Health Publications, Inc., 2004 - Health & Fitness - 211 pages. 2 Reviews. Using cutting-edge research studies from leading sports science laboratories, Nutrient Timing shatters myths and misconceptions about how to provide optimum nutrition to working muscles. It shows that when the right combination of nutrients is delivered at the right time, one can activate his/her body's muscle machinery to increase muscle strength, improve endurance and increase lean muscle mass.

[Nutrient Timing: The Future of Sports Nutrition - John Ivy...](#)

Nutrient Timing adds the missing dimension to sports nutrition, the dimension of time. By timing specific nutrition to your muscle's 24-hour growth cycle, you can activate your body's natural anabolic agents to increase muscle growth and gain greater muscle mass than you ever thought possible.

[Nutrient Timing: The Future of Sports Nutrition: Easyread...](#)

The Three Nutrient Timing Phases The nutrient timing system is split into three distinct phases: 1) Energy Phase (just before and during workout) 2) Anabolic Phase (post-45 minutes of workout) 3) Growth Phase (remainder of the day) The Energy Phase Muscle glycogen is the primary fuel (followed by fat) used by the body during exercise.

[Nutrient Timing - The University of New Mexico](#)

In the early 2000s, with the publication of Nutrient Timing: The Future of Sports Nutrition by Drs. John Ivy and Robert Portman, the idea of nutrient timing became the "Next Big Thing.". Seriously, every sports nutritionist worth their branched chain amino acids owned a copy. Including yours truly.

[Table 10.1 from Nutrient Timing: The Future of Sports ...](#)

Nutrient timing refers to the concept that the timing and content of feeding in-and-around training sessions has a dramatic effect on improvements in muscle mass, body composition and performance. A new vista in sports nutrition - not just what is eaten, but when it is eaten. Overwhelming evidence now supports the specific and the strategic use of liquid formulations to provide carbohydrate and protein in precise amounts to support recovery and training adaptations.
