It is, in other words, the key to reshaping our very lives."—Oprah Winfrey This book is going to change the way you see your life. This volume weaves together ongoing scholarly debates around how to bridge the gap between theory and practice in media and journalism research. It relies heavily on articles media scholars and media practitioners have written on how the sides can work together for the good of society. The contributions to this volume represent the first effort to look at praxis in terms of the dual dynamic of communication and how its two pillars can work together to address relations and interactions from critical perspectives of media and journalism practice and research. The result will lay important groundwork for scholarship on this new and increasingly important phenomenon.

Oprah Winfrey is the protagonist of the story to be told here, but this book has broader intentions, begins Eva Illouz in this original examination of how and why this talk show host has become a pervasive symbol in American culture. Unlike studies of talk shows that decry debased cultural standards and impoverished political consciousness, *Oprah Winfrey and the Glamour of Misery* asks us to rethink our perceptions of culture in general and popular culture in particular. At a time when crises of morality, beliefs, value systems, and personal worth dominate both public and private spheres, Oprah's emergence as a cultural form—the Oprah persona—becomes clearer, as she successfully reiterates some of our most pressing moral questions. Drawing on nearly one hundred show transcripts; a year and a half of watching the show regularly; and analysis of magazine articles, several biographies, *O Magazine*, Oprah Book Club novels, self-help manuals promoted on the show, and hundreds of discussions on the Oprah Winfrey Web site, Illouz takes the Oprah industry seriously, revealing it to be a multilayered "textual structure" that initiates, stages, and performs narratives of suffering and self-improvement that resonate with a wide audience and challenge traditional models of cultural analysis. This book looks closely at Oprah's method and her message, and in the process reconsiders popular culture and the tools we use to understand it.

"In her new book, Lesley Koplow explores the Emotionally Responsive Practice (ERP) approach designed to support children and teachers' emotional well-being in the public-school setting. ERP encourages school staff to look at children through the lens of child development, as well as through the lens of their life experiences, in order to help them resolve foundational social and emotional milestones. Unlike many SEL programs, ERP asks adults to consider the ways that educational philosophy and school climate impact emotional, social, and cognitive outcomes for young children. This timely resource offers teachers, school leaders, and school-based clinicians a vision and blueprint for engaging in relationship-based, trauma-informed practice in early childhood and elementary school grades"--
