This book is an interdisciplinary guide to connect art lessons with core curriculum. Social studies, language arts, math, and/or science are supported in every unit. It is an ideal source for elementary and middle school teachers to enrich their curriculum. It is an invaluable tool for art teachers.

They fondly remember the times when they buzzed over the homes of their Florida "families" to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress."--BOOK JACKET.

Focusing on a period neglected by scholars, Higgins reconstructs how during the colonial period criollos - individuals identified as being of Spanish descent born in America - elaborated a body of knowledge, an "archive," in order to establish their intellectual autonomy within the Spanish colonial administrative structures." "This book opens up an important area of research that will be of interest to scholars and students of Spanish American colonial literature and history."--BOOK JACKET.

This book explores ways in which libraries can reach new levels of service, quality, and efficiency while minimizing cost by collaborating in acquisitions. In consortial acquisitions, a number of libraries work together, usually in

an existing library consortia, to leverage size to support acquisitions in each individual library. In cross-functional acquisitions, acquisitions collaborates to support other library functions. For the library acquisitions manager, technical services manager, or the library director, awareness of different options for effective consortial and cross-functional acquisitions allows for the optimization of staff and resources to reach goals. This work presents those options in the form of case studies as well as useful analysis of the benefits and challenges of each. By supporting each other's acquisitions services in a consortium, libraries leverage size to get better prices, and share systems and expertise to maximize resources while minimizing costs. Within libraries, the acquisitions function can be combined with other library functions in a unit with more than one purpose, or acquisitions can develop a close working relationship with another unit to support their work. This book surveys practice at different libraries and at different library consortia, and presents a detailed description and analysis of a variety of practices for how acquisitions units support each other within a consortium, and how they work with other library units, specifically collection management, cataloging, interlibrary loan, and the digital repository, in the form of case studies. A final section of the book covers fundamentals of collaboration.

Proceedings of the IEEE, IEEE Transactions, IEEE Journals, IEEE Spectrum.

The creation, implementation, and sustainability of new ideas is the lifeblood ensuring the growth and viability of any organization. Without continuing innovation, competitive advantage and global market share are endangered. Once-thriving organizations can find themselves unprepared for the future. A Passion for Ideas gathers together a stunning list of today's thought leaders to shed light on how "the new" is discovered. Via interviews and essays, an exciting and diverse international group of innovators-representing not only business, but also science and the arts-share their insights and help us to understand the process of creativity and construction and the methods to move organizations forward in an ever-changing climate.
