A class library is a collection of frequently used programs that software developers reuse when building applications. This book explains Powersoft's Foundation Class (PCF) Library for PowerBuilder. It covers application development, tuning and maintenance, and running PowerBuilder applications on the Internet. The CD-ROM contains templates and tools for building Internet applications.

This comprehensive guide to the PowerBuilder Foundation Classes lists all the objects and functions that a programmer might use for a project including notes on each function. Service-based architecture and appropriate object-oriented techniques are stressed throughout

PowerBuilder 5.0 is the latest version of Powersoft's best selling client/server development tool. This book concentrates on the core product, but also covers some of the advanced features that are available in the Enterprise version of the software, including C++ class objects and the PFC.

For PowerBuilder, PowerJ and PowerSite developers, the DataWindow object offers remarkable power--and most developers have only scratched the surface of what it can do. Part reference, part tutorial, "The Definitive DataWindow" is a systematic guide covering everything from the basics to the most advanced skills and techniques. The CD-ROM contains all example code, including a complete application, plus a natural language application demo from Elf Software.

This work on the datawindow object should be suitable for beginner to intermediates, and includes a discussion of Structure Query Language and the different types of datawindow and information gathering methods from the database.
