Presenting an alternative to the formal, corporate-style poses of yesteryear, this book offers a modern, vibrant approach that aims to capture a moment in the lifestyle of the person or persons in the picture. Clear, concise text discusses the essential technical aspects of photography from choosing a camera and equipment to an appreciation of exposure, aperture, metering, shutter speed, depth of field and white balance settings, in addition to how natural light, color and movement affect a photograph. A guide to posing helps to ensure dynamic and arresting images. Along with advice on setting up a small studio at home, choice of backgrounds and using artificial light, there are hints and tips on pre-shoot preparations such as make-up, hair styling and suitable clothing for the subject of the portrait. Post-production techniques include skin retouching and color correction, plus a guide to printing options and presentation.

This collection of essays surveys some of the artistic productions by female figures who stood at the forefront of Italian modernity in the fields of literature, photography, and even the theatre, in order to explore how artistic engagement in women informed their views on, and reactions to the challenges of a changing society and a ‘disinhibiting’ intellectual landscape. However, one other objective takes on a central role in this volume: that of opening a window on the re-definition of the subjectivity of the self that occurred during an intriguing and still not fully studied period of artistic and societal changes. In particular, the present volume aims to define a female Italian Modernism which can be seen as complementary, and not necessarily in opposition, to its male counterpart.
