Manual

This is another in a series of books on physical chemistry for biological science majors written by the author. It appears to be a much pared down version of his 2000 text *Physical Chemistry for the Chemical and Biological Sciences*, 3rd Edition. The author is quite explicit about his intended audience, students taking a one-semester introductory course in physical chemistry who have taken general chemistry, organic chemistry, and a year each of physics and calculus.

Manual
Chemistry for the Biosciences introduces the essential concepts of chemistry central to understanding biological systems. With an emphasis on straightforward explanations, it features biological examples illustrating how integral chemistry is to the biosciences, and includes learning features to help students master the essentials.
