List of honey plants - Wikipedia

Different bees are active throughout the year, so you'll need flowering plants from spring to winter. Bees forage from flowers rich in nectar and pollen – the nectar contains sugar they need for energy, and pollen contains protein and oils. Bee species' tongues vary in size, so try to provide different shaped flowers. Trees and shrubs for bees

Grow flowers that bees love - The RSPB

Anise hyssop is an herbaceous perennial plant that comes back each spring. It blooms well throughout the spring and summer. This herb acts as a nectar source for bees, especially when other plants are gone for the year. Not only do bees like anise, but hummingbirds and butterflies enjoy it as well.

21 Bee-Friendly Plants to Attract Pollinators to Your Garden

Bees that have pollen pollinate wheat, potatoes, carrots, beetroots, melon stems, pumpkin stems and berry bushes they fly over. When one of these plants gets pollinated, it advances to another growth stage, similar to using bone meal. To pollinate a plant, the particles that drop must touch it directly.
