This tale of heartache, heroism, and hope is one familys multi generational social experiment, which encompasses kids in their teens, parents in their forties, grandparents in their seventies, and a ninety-plus year-old great-grandmother. Together, as they navigate the joys and challenges that come with aging in America, theyre also answering the question, How does family help you thrive at home when youre old? An Alzheimers/dementia diagnosis adds a layer of complexity, yet the family resolves to keep their eldest at home for as long as shes happy, safe and engaged in life. The younger generation learns much from their elders, and the elders from their children. While mastering the use of technology and new family systems, theyre also mastering the use of humor, tolerance, and patience. Ultimately, thats what makes this four-generation experiment a success.
