This standard defines the qualification requirements to qualify welding inspectors. The qualification requirements for visual welding inspectors include experience, satisfactory completion of an examination which includes demonstrated capabilities, and proof of visual acuity. The examination tests the inspector's knowledge of welding processes, welding procedures, nondestructive examinations, destructive tests, terms, definitions, symbols, reports, welding metallurgy, related mathematics, safety, quality assurance and responsibilities.

Specifiers, producers, testing labs, inspection consultants, teachers, designers, and quality technicians should all have a copy of this QC manual. These standards and the accompanying commentary will serve as a strong foundation for a plant's quality system for the manufacture of structural precast concrete products and for the manufacture of structural precast concrete products with architectural finishes

The newest publication from the Tilt-Up Concrete Association is the second in a planned trilogy of resources covering the architecture, engineering and construction of Tilt-Up. Continuing the high quality with which *The Architecture of Tilt-Up* was printed and assembled, the new (10 1/2 x 10 1/2) book presents state-of-the art information and large colorful imagery of the construction process. Topics include: planning, slabs and foundations, panel layout and forming, reinforcement, inserts and embedded items, placing and finishing of the panels, lifting, setting and bracing of the panels, connections and finishing touches.
