Principles of Systematic Zoology by Mayr - AbeBooks  
About this book. Taxonomy, the study of the rules, principles and practice of classifying living organisms, has undergone a revolution in the 20 years since the first edition of this book appeared. The latest edition has been completely rewritten, to account for the advances made in this period. It is split into three sections: part A looks at Microtaxonomy - taxonomy at the species level; part B looks at Macrotaxonomy - the classification of higher taxa; finally, part C explains the ...
