Exercise :: Probability - General Questions. 1. Tickets numbered 1 to 20 are mixed up and then a ticket is drawn at random. What is the probability that the ticket drawn has a number which is a multiple of 3 or 5? Here, $S = \{1, 2, 3, 4, \dots, 19, 20\}$.

Probability - Aptitude Questions and Answers

Sales Forecasting Interview Questions ; Question 18. What Is Significance Level? Answer : The probability of rejecting the null hypothesis when it is called the significance level α , and very common choices are $\alpha = 0.05$ and $\alpha = 0.01$. Managerial Economics Interview Questions ; Question 19. Give Example Of Central Limit Theorem? Answer :

TOP 250+ Statistics Interview Questions and Answers 26 ...

If you had picked clubs in each of the previous 3 draws, then your probability of drawing the last club will be $1/13$. If you had drawn 2 clubs in the previous 3 draws, your probability would be $2/13$ and so forth. Hence, you will need to add up $1/13+2/13+3/13+4/13$ to get $10/13$, which should be the final answer.
