## Rational Functions | Precalculus - Lumen Learning

A rational function will have a  $(y)$ -intercept at  $(f(0), 1)$  if the function is defined at zero. A rational function will not have a  $(y)$ -intercept if the function is not defined at zero. Likewise, a rational function will have  $(x)$ -intercepts at the inputs that cause the output to be zero.

Subsequent. We put the positive ones to the right and the negative ones to the left. 7:08 Skip to 7 minutes and 8 seconds Once we have these numbers placed, we find it fairly easy to place any number on the axis in the following sense. If I want to ...

## Rational numbers - Precalculus

For the following exercises, express a rational function that describes the situation. A large mixing tank currently contains 300 gallons of water, into which 8 pounds of sugar have been mixed. A tap will open, pouring 20 gallons of water per minute into the tank at the same time sugar is poured into the tank at 2 pounds per minute.
