How is it possible that both university graduates and unfilled job openings are both at record-breaking highs? Our world has changed. New and emerging occupations in every industry now require a combination of academic knowledge and technical ability. With rising education costs, mounting student debt, fierce competition for jobs, and the oversaturation of some academic majors in the workforce, we need to once again guide students towards personality-aligned careers and not just into college. Extensively researched, (Re)Defining the Goal deconstructs the prevalent "one-size-fits-all" education agenda. The author provides a fresh perspective, replicable strategies, and outlines six proven steps to help students secure a competitive advantage in the new economy. Gain a new paradigm and the right resources to help students avoid the pitfalls of unemployment, or underemployment, after graduation.

The community and technical college mission requires offering relevant Career and Technical Education (CTE) programs. Board policies are plentiful for creating new programs in alignment with workforce needs. However, few districts have robust policies in place to appropriately discontinue or replace CTE programs. This book identifies successful CTE program discontinuance including how people feel about the process and the impact of institutional culture. The interviews and policy analysis conducted provide best practices to effectively and appropriately discontinue CTE programs. Eleven practical recommendations are outlined to help community and technical colleges in establishing program discontinuance processes which strategically and effectively discontinue CTE programs while making optimal use of limited fiscal and human resources. This book provides readers with information on career and technical education, appropriate strategies to manage the constant churning of CTE programs, college governance, and academic discontinuance policies.

#1 New York Times Bestseller Legendary venture capitalist John Doerr reveals how the goal-setting system of Objectives and Key Results (OKRs) has helped tech giants from Intel to Google achieve explosive growth—and how it can help any organization thrive. In the fall of 1999, John Doerr met with the founders of a start-up whom he'd just given \$12.5 million, the biggest investment of his career. Larry Page and Sergey Brin had amazing technology, entrepreneurial energy, and sky-high ambitions, but no real business plan. For Google to change the world (or even to survive), Page and Brin had to learn how to make tough choices on priorities while keeping their team on track. They'd have to know when to pull the plug on losing propositions, to fail fast. And they needed timely, relevant data to track their progress—to measure what mattered. Doerr taught them about a proven approach to operating excellence: Objectives and Key Results. He had first discovered OKRs in the 1970s as an engineer at Intel, where the legendary Andy Grove ("the greatest manager of his or any era") drove the best-run company Doerr had ever seen. Later, as a venture capitalist, Doerr shared Grove's brainchild with more than fifty companies. Wherever the process was faithfully practiced, it worked. In this goal-setting system, objectives define what we seek to achieve; key results are how those top-priority goals will be attained with specific, measurable actions within a set time frame. Everyone's goals, from entry level to CEO, are transparent to the entire organization. The benefits are profound. OKRs surface an organization's most important work. They focus effort and foster coordination. They keep employees on track. They link objectives across silos to unify and strengthen the entire company. Along the way, OKRs enhance workplace satisfaction and boost retention. In Measure What Matters, Doerr shares a broad range of first-person, behind-the-scenes case studies, with narrators including Bono and Bill Gates, to demonstrate the focus, agility, and explosive growth that OKRs have spurred at so many great organizations. This book will help a new generation of leaders capture the same magic.

"So many jobs I could put to the test.With my natural skills, I'll find which hat fits best"We often ask a child, "What do you want to be when you grow up?" This question implies there should be one fixed answer. But more likely your child will experiment with many occupations and may explore multiple careers throughout their life. At all ages children show interests, abilities, gifts, and unfulfilled potential. Observing these subtle signs and encouraging exploration towards activities that align with their personality will point them towards satisfying and meaningful careers. Both children and adults alike will be delighted by the melodic rhymes and colorful monkey illustrations trying on hats from different jobs in search for a perfect fit. Of course, the most important job may be closer than first imagined.

Life is just like walking through the rain--whether you dance through it (and have fun) or just try to avoid the puddles--you still get wet. Your life has a God-authored plan that can be exciting or can be drudgery--it all depends on how you choose to see each circumstance in your day. Each day, you can be surrounded by circumstances that test who you say you are. Those are circumstances that test your character. Circumstances like financial hardship, failed relationships, unexpected opportunities, unplanned success, or a blow to your self-esteem. Circumstances as trivial as an argument with your spouse, or as difficult as an

argument with your spouse. You might think that God has deserted you when you have difficult circumstances in life, but you can find that He is closer than ever before. Re-Defining Success: Finding New Hope lets you know that you aren't the only one who has fouled up in some aspect of life and that you can come out of the situation that you are in stronger and smarter than you were yesterday. Instead of wondering about your future, take this opportunity to step out in faith and begin to learn God's plan for you. As you make a new start in your life, you have the chance to make changes in the person you are and to live in the plan He has for you. Re-Defining Success: Finding New Hope can help you see a larger picture for your life and be encouraged that these circumstances are life-challenges which have a reason.

Do you ever wonder how some people make success look so simple? In Succeed, award-winning social psychologist Heidi Grant Halvorson offers counterintuitive insights, illuminating stories, and science-based information that can help anyone:

- Set a goal to pursue even in the face of adversity
- Build willpower, which can be strengthened like a muscle
- Avoid the kind of positive thinking that makes people fail

Whether you want to motivate your kids, your employees, or just yourself, Succeed unlocks the secrets of achievement, and shows you how to create new possibilities in every area of your life.

The focus of this book is centered on the participation of children in countries of the South. In this sense, it will review the possibilities of children's participation, as well as their forms of participation in different contexts of daily life. There has been a tendency to underestimate children's role as active constructors of their surrounding social space, as well as of the internalized interpretations of the way social life operates. Today it is necessary to recognize that children are agents actively involved in the construction of their own lives and the life of the societies they live in; and in this sense, it is important to consider and re-signify the participation of boys and girls as a fundamental pillar in the process of building societies in the 21st century. The book contains chapters that re-significate children's participation in different countries from South America and South Africa, in relation with different topics: well-being, methods, citizenship, poverty, education, rurality, ethics and human rights.
