Steps of the Scientific Method—Science Fair Project—

Scientific Steps. Presentation. Investigation. The key to a good and manageable investigation is to choose a topic of interest, then ask what is called a "testable question.". Testable questions are those that can be answered through hands-on investigation by the student. The key difference between a general interest science question and a testable question is that testable questions are always about changing one thing to see what the effect is on another thing.
