Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

This book constitutes the refereed proceedings of the 16th International Conference on Foundations of Software Technology and Theoretical Computer Science, FST&TCS '96, held in Hyderabad, India, in December 1996. The volume presents 28 revised full papers selected from a total of 98 submissions; also included are four invited contributions. The papers are organized in topical sections on computational geometry, process algebras, program semantics, algorithms, rewriting and equational-temporal logics, complexity theory, and type theory.

Preclinical Speech Science: Anatomy, Physiology, Acoustics, and Perception, Third Edition is a high-quality text for undergraduate and graduate courses in speech and hearing science. Written in a user-friendly style by distinguished scientists/clinicians who have taught the course to thousands of students at premier academic programs, it is the text of choice for instructors and students. Additionally, it is applicable to a broad range of courses that cover the anatomy and physiology of speech production, speech acoustics, and swallowing as well as those that cover the hearing mechanism, psychoacoustics, and speech perception. The material in this book is designed to help future speech-language pathologists and audiologists to understand the science that underpins their work and provide a framework for the evaluation and management of their future clients. It provides all the information students need to be fully ready for their clinical practicum training. **KEY FEATURES:** Describes scientific principles explicitly and in translational terms that emphasize their relevance to clinical practice. Features beautiful original, full-color illustrations designed to be instructive learning tools. Incorporates analogies that aid thinking about processes from different perspectives. Features "sidetracks" that contain clinical insights and relate interesting historical and contemporary facts to the discipline of speech and hearing science. Provides a framework for conceptualizing the uses, subsystems, and levels of observation of speech production, hearing, and swallowing. Includes material that is ideal for preparing both undergraduates and graduates for clinical study. **NEW TO THE THIRD EDITION:** Three new, up-to-date, and comprehensive chapters on auditory anatomy and physiology, auditory psychophysics, and speech physiology measurement and analysis. All chapters fully revised, including updated references and new full-color, detailed images. *Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

This book constitutes the refereed proceedings of the Second International Conference on Innovative Technologies and Learning, ICITL 2020, held in Porto, Portugal, in November 2020. The 65 full papers presented together with 2 short papers were carefully reviewed and selected from 127 submissions. The papers are organized in the following topical sections: Augmented and Virtual Reality in Education; Educational Data Mining and Learning Analytics; Emerging Issues and Trends in Education; Innovative Learning in Education; Online Course and Web-Based Environment; Technology-Enhanced Learning; Application and Design of Innovative Learning Software; and Science, Technology, Engineering, Arts and Design, and Mathematics. Due to the Corona pandemic this event was held virtually.
