The `security_admin` role is an elevated privilege role provided with High Security Settings that lets users create and change access controls and change High Security Settings.

`security_admin` role - ServiceNow

The following standard roles are included in the base ServiceNow system with a new instance. Note: The system does not support changing the name of any base system role. Changing the name of a base system role will prevent users and groups from accessing base system resources that depend on these roles. Table 1. Base system roles; Role Description; admin: The administrator role. This role has ...
