As a professional working with families ravaged by addiction, and as a member of Al-Anon seeking to grow and be a good steward of the life experiences that are mine, I am challenged by this book to seek ways to apply its techniques with clients and my own life...Ms. England's book reminds me in the particularly memorable way of any good story...that there is both danger and delight in this activity of living.

Circus Mirandus meets *Cartwheeling in Thunderstorms* in this beautifully written fantasy novel about a girl who must face her fears in order to right a terrible wrong, confront what it means to be different, and discover her own power. Smoke has come to the Cirque Magnifique. And Sasha Brown is sure it is her fault. Sasha has always loved the Cirque, a place filled with sequined costumes, dazzling spotlights, and magnificent tents. But when she starts fifth grade with the Islanders—the ordinary folk from the other side of the Island—for the first time, she ' s not so sure she wants to be a Cirque kid. She starts to question her home and her Cirque family. Is the magic real? Are the stories even true? As the bullying by the Island kids gets worse, swirling blue-gray Smoke appears. One night in the big tent, Sasha ' s dad performs, twisting his body through the air as the lights dance. Sasha is supposed to be helping, but instead she sits beneath the bleachers, seething. She has wished for the Smoke to come and make it all disappear: the Cirque, her family, the Island with its mean Island kids. And the Smoke does come. As Sasha watches her dad, he flips and raises his arms out for the bar that is supposed to meet him, his bright grin confident and sure. But there is only air...and Smoke. Both of Sasha ' s parents disappear that night, and it ' s all Sasha ' s fault. What can she do but try and find them?

more Africans than Europeans crossed the Atlantic Ocean to the Americas. While this forced migration stripped slaves of their liberty, it failed to destroy many of their cultural practices, which came with Africans to the New World. In *Working the Diaspora*, Frederick Knight examines work cultures on both sides of the Atlantic, from West and West Central Africa to British North America and the Caribbean. Knight demonstrates that the knowledge that Africans carried across the Atlantic shaped Anglo-American agricultural development and made particularly important contributions to cotton, indigo, tobacco, and staple food cultivation. The book also compellingly argues that the work experience of slaves shaped their views of the natural world. Broad in scope, clearly written, and at the center of current scholarly debates, *Working the Diaspora* challenges readers to alter their conceptual frameworks about Africans by looking at them as workers who, through the course of the Atlantic slave trade and plantation labor, shaped the development of the Americas in significant ways.

Brown in *Smoke and Mirrors* fights back against figures such as Richard Rorty, Bruno Latour, Michael Ruse and Hilary Putnam who have attacked realist accounts of science. But this volume is not wholly devoted to combating Rorty and others who blow smoke in our eyes; the second half is concerned with arguing that there are some amazing ways in which science mirrors the world. The role of abstraction, abstract objects and a priori ways of getting at reality are all explored in showing how science reflects reality. *Smoke and Mirrors* is a defence of science and knowledge in general as well as a defence of a particular way of understanding science. It is of interest to all those who wish or need to know how science works.
