It describes language variation in its social context and it was William Labov who opened the door to such a study, which had been neglected completely in linguistic theory. Speech variation as an important subject has been discussed by many sociolinguists in different dimensions.

A Sociolinguistic Study of Language Variation

Sociolinguistics is the descriptive study of the effect of any and all aspects of society, including cultural norms, expectations, and context, on the way language is used, and society's effect on language. It differs from sociology of language, which focuses on the effect of language on society. Sociolinguistics overlaps considerably with pragmatics. It is closely related to linguistic anthropology; some question the distinction between the two fields, emphasizing their historical interrelation

Sociolinguistics - Wikipedia

The basic premise of sociolinguistics is that language is variable and ever-changing. As a result, language is not uniform or constant. Rather, it is varied and inconsistent for both the individual user and within and among groups of speakers who use the same language. People adjust the way they talk to their social situation.
