Economic change is a shift in the structure of an economic system. This results in changes to societies, cultures and everyday life on a global or national basis. Economic change caused by technology, politics and progress is a regular feature of history. The following are illustrative examples of economic change.

15 Examples of Economic Change - Simplicable
It is possible that internal changes occur within the elements of work, but by maintaining the relationships between them, the same economic structure will be preserved. For example, in the case of manufacturing industry, it is possible to consider as part of the elements that represent social relations to capitalist investors and wage labor.

What is an Economic Structure? | Life Persona
One consequence of the emergence of the new economic structure was that population growth accelerated. This was partly attributable to marginal increase in birth rate and largely to fall in the death rate (following the growing demand for and supply of medical care and control of malignant diseases).
