more as he shines a light on the ancient context of Scripture. After reading this book, you may never read your Bible the same way again. In *Supernatural*, Heiser takes the core message from his recent best-seller, *The Unseen Realm*, and presents it for the person in the pew. He offers the same approach to reading and understanding Scripture, but without all the extra footnotes and supporting information needed for the scholarly treatment. “ We can ’ t believe what we don ’ t understand. In *Supernatural*, Michael Heiser helps us to do both. It may open your eyes to the scripture in a new way. ” —John Ortberg, author of *If You Want to Walk on Water, You ’ ve Got to Get Out of the Boat*

Publisher ’ s Note: A new, expanded edition has replaced this book under the new title *Visionary: The Mysterious Origins of Human Consciousness*, this definitive edition includes a new Introduction by Graham Hancock as well as restored chapters that were omitted from the original paperback release. Less than fifty thousand years ago mankind had no art, no religion, no sophisticated symbolism, no innovative thinking. Then, in a dramatic and electrifying change, described by scientists as "the greatest riddle in human history," all the skills and qualities that we value most highly in ourselves appeared already fully formed, as though bestowed on us by hidden powers. In *Supernatural* Graham Hancock sets out to investigate this mysterious "beforeandafter moment" and to discover the truth about the influences that gave birth to the modern human mind. His quest takes him on a detective journey from the stunningly beautiful painted caves of prehistoric France, Spain, and Italy to rock shelters in the mountains of South Africa, where he finds extraordinary Stone Age art. He uncovers clues that lead him to the depths of the Amazon rainforest to drink the powerful hallucinogen Ayahuasca with shamans, whose paintings contain images of "supernatural beings" identical to the animalhuman hybrids depicted in prehistoric caves. Hallucinogens such as mescaline also produce visionary encounters with exactly the same beings. Scientists at the cutting edge of consciousness research have begun to consider the possibility that such hallucinations may be real perceptions of other "dimensions." Could the "supernaturals" first depicted in the painted caves be the ancient teachers of mankind? Could it be that human evolution is not just the "meaningless" process that Darwin identified, but something more purposive and intelligent that we have barely begun to understand?
