For 1982, in the North American market, the Celica Supra's engine was the 2.8-liter 12-valve (two valves per cylinder) DOHC 5M-GE. Power output was 145 hp (108 kW; 147 PS) SAE net and 155 lb ft (210 N m) of torque. The engine used an 8.8:1 compression ratio to achieve the power and featured a vacuum advanced distributor.

The Supra is an excellent sports car that manages to combine extravagant looks and exciting performance with a demure side that 'll make it a very usable everyday car. It was co-developed alongside the BMW Z4, meaning the two cars share plenty, and whether that's a positive thing or a negative thing will depend on your point of view. However, there's no doubt that if the idea of a Porsche ...
