The Audco Manual - shop.kawaiilabotokyo.com

OPERATION Serck Audco TIPV plug valves are Double Block & Bleed valves designed to give bubble tight shut off. TIPV plug valves have a ¼ turn operation (i.e. they have a 90 degree rotation of the plug in operating from the fully open to the fully closed) and close in the clockwise direction when viewed from above the valve stem.

Industries that use pumps, seals and pipes will also use valves and actuators in their systems. This key reference provides anyone who designs, uses, specifies or maintains valves and valve systems with all of the critical design, specification, performance and operational information they need for the job in hand. Brian Nesbitt is a well-known consultant with a considerable publishing record. A lifetime of experience backs up the huge amount of practical detail in this volume. * Valves and actuators are widely used across industry and this dedicated reference provides all the information plant designers, specifiers or those involved with maintenance require * Practical approach backed up with technical detail and engineering know-how makes this the ideal single volume reference * Compares and contrasts valve and actuator types to ensure the right equipment is chosen for the right application and properly maintained

This definitive guide to valve selection is the result of the author's lifelong study of the design and application of valves. It covers the fundamentals of sealing mechanisms, as well as the sealability of fluids and flow through valves. You will find a complete analysis of valve designs for various industrial flow applications. This fourth edition is thoroughly updated, with revised and expanded chapters on pressure relief valves and rupture discs. This book takes into account U.S. practices and codes as well as emerging European standards. The book is an excellent reference text for practicing engineers and students. It is also of interest to valve manufacturers and authorities who evaluate and establish standards.
