Study Guide Answers: Blood and the Cardiovascular System

- The sac enclosing the heart is known as the pericardium.
- The right side of the heart is the pulmonary circuit pump.
- Pumps blood through the lungs, where CO₂ is unloaded and O₂ is picked up.
- The left side of the heart is the systemic circuit pump.
- Pumps blood to the tissues, delivering O₂ and nutrients and picking up CO₂ and

Download Ebook The Cardiovascular System

Study Guide cardiovascular system has three major functions: transportation of materials, protection from pathogens, and regulation of the body's homeostasis. Transportation: The cardiovascular system transports blood to almost all of the body's tissues. The blood delivers essential nutrients and oxygen and removes wastes and carbon dioxide to be processed or removed from the body.
