The information you need to make informed decisions about whether to pursue psychology as a major and career is found in this handbook--as are useful tips that will help you succeed in their psychology course. The first chapter introduces you to the scope of psychology and the subspecialties within psychology. Subsequent chapters help you assess your skills, abilities, and interests. Career opportunities are presented so you can decide whether psychology is an appropriate major for you.

Connecting career aspirations with the post-college world is crucial for students today. Learners must keep sight of future career opportunities while exploring a broad expanse of degrees paths and career options. Careers in Psychology, Fifth Edition helps students navigate and plan for their futures by offering exposure to the rich careers in each subfield of psychology and prompting students to consider the what, why and how of each option. In doing so, the text supports students as they determine whether a major and career in psychology is for them. Offering salary and career information, advice on getting a job after graduation, and information on applying to graduate school in psychology Tara L. Kuther and Robert D. Morgan support students in making an educated decision about their futures and career options.

As it "illuminates the crisis of liberal education and offers proposals for reform which deserve full debate" (Morton Halperin, American Civil Liberties Union), "Illiberal Education" "documents how the politics of race and gender in our universities are rapidly eating away traditions of scholarship and reward for individual achievement" (Robert H. Bork). (Education/Teaching)

Updated with nearly forty new selections to reflect the tremendous growth and transformation of scholarly, theological, and activist religious environmentalism, the second edition of This Sacred Earth is an unparalleled resource for the study of religion's complex relationship to the environment.

his patients. In response, he probes the hidden layers of personality to reveal the core of man's integration--a basic and inborn sense of value. Man's Search for Himself is an illuminating view of our predicament in an age of overwhelming anxieties and gives guidance on how to choose, judge, and act during such times.

An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in R^3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

With this book, the authors support content-area and language arts teachers alike by pairing more than 75 short, kid-tested reproducible nonfiction texts with 33 simple, ready-to-go lessons that deepen comprehension and support effective collaboration.--[book cover]
