A revealing memoir of a family and a " wrenching journey into deafness from the standpoint of a mother, a wife, a daughter, a philosopher, and a Jew " (Ilan Stavans, author of On Borrowed Words: A Memoir of Language). When her daughters were born deaf, Jennifer Rosner was stunned. Then she discovered a hidden history of deafness in her family, going back generations to the Jewish enclaves of Eastern Europe. Traveling back in time in her mind, she imagined her silent relatives, who showed surprising creativity in dealing with a world that preferred to ignore them. Here, in a " gentle meditation on sound and silence, love and family " Rosner shares her journey into the modern world of deafness, and the controversial decisions she and her husband made about hearing aids, cochlear implants and sign language (Publishers Weekly). Punctuated by memories of being unheard, Rosner ' s imaginative odyssey of dealing with her daughters ' deafness is at its heart a story of whether she—a mother with perfect hearing—can ever truly hear her children.

A breathless, high-stakes quest to save the miniature world of the Tree —and reunite loved ones lost —unfolds with wit, suspense, and startling revelations. A giant crater has been dug right into the center of the Tree, moss and lichen have invaded the branches, and one tyrant controls it all. Leo Blue, once Toby ' s best friend, is holding Toby ' s beloved Elisha prisoner, hunting the Grass People with merciless force, and inflicting a life of poverty and fear on the Tree People. But after several years among the Grass People, Toby has returned to fight back. And this time he ' s not alone: a resistance is forming. In the much-anticipated sequel to the award-winning TOBY ALONE, the compelling eco-adventure reaches its gripping conclusion.

NEW YORK TIMES BEST SELLER • From the world's leading forest ecologist who forever changed how people view trees and their connections to one another and to other living things in the forest—a moving, deeply personal journey of discovery Suzanne Simard is a pioneer on the frontier of plant communication and intelligence; she's been compared to Rachel Carson, hailed as a scientist who conveys complex, technical ideas in a way that is dazzling and profound. Her work has influenced filmmakers (the Tree of Souls of James Cameron's Avatar) and her TED talks have been viewed by more than 10 million people worldwide. Now, in her first book, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital truths—that trees are not simply the source of timber or pulp, but are a complicated, interdependent circle of life; that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard writes—in inspiring, illuminating, and accessible ways—how trees, living side by side for hundreds of years, have evolved, how they perceive one another, learn and adapt their behaviors, recognize neighbors, and remember the past; how they have agency about the future; elicit warnings and mount defenses, compete and cooperate with one another with sophistication, characteristics ascribed to human intelligence, traits that are the essence of civil societies—and at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that surround them. Simard writes of her own life, born and raised into a logging world in the rainforests of British Columbia, of her days as a child spent cataloging the trees from the forest and how she came to love and respect them—embarking on a journey of discovery, and struggle. And as she writes of her scientific quest, she writes of her own journey—of love and loss, of observation and change, of risk and reward, making us understand how deeply human scientific inquiry exists beyond data and technology, that it is about understanding who we are and our place in the world, and, in writing of her own life, we come to see the true connectedness of the Mother Tree that nurtures the forest in the profound ways that families and human societies do, and how these inseparable bonds enable all our survival.

The master. Puts all other modern tree-writers in the shade! John Lewis-Stempel, author of Meadowland Thomas Pakenham is an indefatigable champion of trees. In The Company of Trees he recounts his personal quest to establish a large arboretum on the family estate, Tullynally in Ireland; his forays to other tree-filled parks and plantations; his often hazardous seed-hunting expeditions; and his efforts to preserve magnificent old trees and historic woodlands. Whether writing about the terrible storms breaking the backs of hundred-year-old trees or a fire in the peat bog on Tullynally which threatens to spread to the main commercial spruce-woods, his fear of climate change and disease, or the sturdy young saplings giving him hope for the future, his book is never less than enthralling.

Readers of exciting, challenging and visionary literary fiction—including admirers of Norman Rush's Mating, Ann Patchett's State of Wonder, Barbara Kingsolver's The Poisonwood Bible, and Peter Matthiessen's At Play in the Fields of the Lord—will be drawn to this astonishingly gripping and accomplished first novel. A decade in the writing, this is an anthropological adventure story that combines the visceral allure of a thriller with a profound and tragic vision of what happens when cultures collide. It is a book that instantly catapults Hanya Yanagihara into the company of young novelists who really, really matter. In 1950, a young doctor called Norton Perina signs on with the anthropologist Paul Tallent for an expedition to the remote Micronesian island of Ivu'Ivu in search of a rumored lost tribe. They succeed, finding not only that tribe but also a group of forest dwellers they dub "The Dreamers," who turn out to be fantastically long-lived but progressively more senile. Perina suspects the source of their longevity is a hard-to-find turtle; unable to resist the possibility of eternal life, he kills one and smuggles some meat back to the States. He scientifically proves his thesis, earning worldwide fame and the Nobel Prize, but he soon discovers that its miraculous property comes at a terrible price. As things quickly spiral out of his control, his own demons take hold, with devastating personal consequences.

<div><div><div><div><div></div></div></div><div><div><div></div></div><div><div></div></div></div></div></div> <div>"In prose as strong and quietly beautiful as the American chestnut itself, Susan Freinkel profiles the silent catastrophe of a near-extinction and the impassioned struggle to bring a species back from the brink. Freinkel is a rare hybrid: equally fluid and in command as a science writer and a chronicler of historical events, and graced with the poise and skill to seamlessly graft these talents together. A perfect book."—Mary Roach, author of Stiff and Spook "A spellbinding, heart wrenching, and uplifting account of the American chestnut that asks the vastly important question: Have we learned enough, and do we care enough, to begin healing some of the wounds we've inflicted on the natural world?"—Scott Weidensaul, author of Return to Wild America and Mountains of the Heart "This is a beautifully written account of the passing of one of the botanical wonders of the North American landscape, the American chestnut tree, which was nearly extirpated by a plague that entered the ecosystem and swept these great trees away. Freinkel, a gifted writer whose research is impeccable and whose reporting is topnotch, tells of the impassioned work of scientists over the past century and up to today, trying to bring the American chestnut back from the brink of extinction. Only a person in love with trees could have written this lovely book."—Richard Preston, author of The Hot Zone and The Wild Trees "Graceful, provocative, and inspiring. Thoreau would be proud."—Alan Burdick, author of Out of Eden, a 2005 National Book Award finalist "In this beautifully written volume, Susan Freinkel ably describes the marriage of science and passion that is being brought to bear to save this majestic American tree from extinction. The people whose ancestors lived among chestnut trees and their places come alive for the reader, as does the appearance and spread of the blight and the heroes who are struggling with it today. The book concludes with a tantalizing vision of chestnuts in the forests again—a thought of making the world right where it has gone wrong."—Peter H. Raven, Director of the Missouri Botanical Garden</div>

Guitars inspire cult-like devotion: an aficionado can tell you precisely when and where their favorite instrument was made, the wood it is made from, and that wood ' s unique effect on the instrument ' s sound. In The Guitar, Chris Gibson and Andrew Warren follow that fascination around the globe as they trace guitars all the way back to the tree. The authors take us to guitar factories, port cities, log booms, remote sawmills, Indigenous lands, and distant rainforests, on a quest for behind-the-scenes stories and insights into how guitars are made, where the much-cherished guitar timbers ultimately come from, and the people and skills that craft those timbers along the way. Gibson and Warren interview hundreds of people to give us a first-hand account of the ins and outs of production methods, timber milling, and forest custodianship in diverse corners of the world, including the Pacific Northwest, Madagascar, Spain, Brazil, Germany, Japan, China, Hawaii, and Australia. They unlock surprising insights into longer arcs of world history; on the human exploitation of nature, colonialism, industrial capitalism, cultural tensions, and seismic upheavals. But the authors also strike a hopeful note, offering a parable of wider resonance—of the incredible but underappreciated skill and care that goes into growing forests and felling trees, milling timber, and making enchanting musical instruments, set against the human tendency to reform our use (and abuse) of natural resources only when it may be too late. The Guitar promises to resonate with anyone who has ever fallen in love with a guitar.
