BSc (Physics) students as per the UGC Choice Based Credit System. This textbook provides a thorough understanding of the fundamental concepts of electricity, magnetism and electromagnetic theory. Having a problem-solving approach, it covers the entire spectrum of the subject with discussion on topics such as electrostatics, magnetostatics, electromagnetic induction, Maxwell's equations and electromagnetic wave propagation. The concepts are exhaustively presented with numerous examples and figures/diagrams which would help the students in analysing and retaining the concepts in an effective manner.

This is the first reader to gather primary sources from influential theorists of the late 20th and early 21st centuries in one place, presenting the wide-ranging and nuanced theoretical debates occurring in the field of religious studies. Each chapter focuses on a major theorist and contains:

- an introduction contextualizing their key ideas
- one or two selections representative of the theorist's innovative methodological approach(es)
- discussion questions to extend and deepen reader engagement

Divided in three sections, the first part includes foundational comparative debates:

- Mary Douglas's articulation of purity and impurity
- Phyllis Tribble's methods of reading sacred texts
- Wendy Doniger's comparative mythology
- Catherine Bell's reimagining of religious

and secular ritual The second part focuses on methodological particularity: · Alice Walker's use of narrative · Charles Long's critique of Eurocentricism · Caroline Walker Bynum's emphasis on gender and materiality The third section focuses on expanding boundaries: · Gloria Anzaldúa's work on borders and languages · Judith Butler's critique of gender and sex norms · Saba Mahmood's expansion on the critique of colonialism's secularizing demands Reflecting the cultural turn and extending the existing canon, this is the anthology instructors have been waiting for. For further detail on the theorists discussed, please consult *Cultural Approaches to Studying Religion: An Introduction to Theories and Methods*, edited by Sarah J. Bloesch and Meredith Minister.

Wendy Doniger's foundational study is both modern in its engagement with a diverse range of religions and refreshingly classic in its transhistorical, cross-cultural approach. By responsibly analyzing patterns and themes across context, Doniger reinvigorates the comparative reading of religion, tapping into a wealth of narrative traditions, from the instructive tales of Judaism and Christianity to the moral lessons of the Bhagavad Gita. She extracts political meaning from a variety of texts while respecting the original ideas of each. A new preface confronts the difficulty of contextualizing the comparison of religions as well as controversies over
