The machine has a float in the dirty water tank that is designed to rise with the level of the water. However, if the machine is jolted, or there is a large amount of foam in the tank, the float may rise to the top. The rising float will block the suction and the machine will make a high pitched noise.

The Vax Platinum Power Max impressed us across the board. With this model, intuitive design meets perfect performance. Read the full GHI review.

This best-selling text is written for those who use, rather than develop statistical methods. Dr. Stevens focuses on a conceptual understanding of the material rather than on proving results. Helpful narrative and numerous examples enhance understanding and a chapter on matrix algebra serves as a review. Annotated printouts from SPSS and SAS indicate what the numbers mean and encourage interpretation of the results. In addition to demonstrating how to use these packages, the author stresses the importance of checking the data, assessing the assumptions, and ensuring adequate sample size by providing guidelines so that the results can be generalized. The book is noted for its extensive applied coverage of MANOVA, its emphasis on statistical power, and numerous exercises including answers to half. The new edition features: New chapters on Hierarchical Linear Modeling (Ch. 15) and Structural Equation Modeling (Ch. 16) New exercises that feature recent journal articles to demonstrate the actual use of multiple regression (Ch. 3), MANOVA (Ch. 5), and repeated measures (Ch. 13) A new appendix on the analysis of correlated observations (Ch. 6) Expanded discussions on obtaining non-orthogonal contrasts in repeated measures designs with SPSS and how to make the identification of cell ID easier in log linear analysis in 4 or 5 way designs Updated versions of SPSS (15.0) and SAS (8.0) are used throughout the text and introduced in chapter 1 A book website with data sets and more. Ideal for courses on multivariate statistics found in psychology, education, sociology, and business departments, the book also appeals to practicing researchers with little or no training in multivariate methods. Prerequisites include a course on factorial ANOVA and covariance. Working knowledge of matrix algebra is not assumed.

Annually updated combination pocket drug reference/handbook for all student and practicing nurses in classroom and clinical settings. A free disk contains data on 150 commonly prescribed drugs.

For extensive nursing considerations (including nursing diagnoses), as well as current, comprehensive drug safety information, here's where to turn. Organized alphabetically, it includes detailed coverage of IV drugs, interactions between drugs, and more. A color drug administration guide illustrates drug administration procedures for drugs given intravenously and intramuscularly. Each copy also includes a CD-ROM that contains patient teaching guides in both English and Spanish, additional drug information, and more. Provides detailed information on more than 60 drug classifications and 4,000 individual generic and trade name drugs. Presents monographs in A-to-Z order by generic drug name for quick access. Individual drug monographs cover: generic name, followed by Rx or OTC designation; pronunciation; U.S. and Canadian trade names; functional and chemical classification; pregnancy category; action; therapeutic outcome; uses; dosages and routes; available forms; side effects/adverse reactions; contraindications; precautions; do not confuse, pharmacodynamics; pharmacokinetics; interactions/incompatibilities; nursing considerations; and treatment of overdose. Features a student-friendly two-color design that highlights important information and includes icons for key drugs, therapeutic outcome, IV administration, lifespan content, nursing alerts, "Do Not Crush" precautions, herbal interactions, and nursing diagnoses. Identifies high-alert drugs most likely to cause harm if administered incorrectly. Provides a biannual update on newly released drugs. Includes a color atlas of medication administration that clearly depicts key steps in drug administration for various routes. Includes extensive interactions information when appropriate for drug-to-drug, drug-to-drug category, drug-to-food, drug-to-herb, and lab test interferences. Provides 14 appendices of additional drug information. Includes a 2006 update section with approximately 20 new monographs for drugs recently approved by the FDA. Features new "Tall Man" lettering for easily confused drug names in accordance with the latest FDA recommendations, and deletion of error-prone abbreviations. Includes current NANDA nursing diagnoses and cross references to material in the appendices. Includes table of "Recent FDA Drug Approvals" that provides generic/trade names and uses for the most recently approved drugs.
