When an air conditioner begins to fail, the most common thought is that the AC needs a refrigerant recharge. However, low refrigerant is not the cause for an AC which intermittently blows cold air. If you find that your AC functions properly for only the first few minutes of use, the problem is most likely associated with the A/C compressor clutch .

How to Fix Intermittent A/C in a Volvo (P1/All)

I have a 2004 Volvo 780 (commercial truck) with a 500 HP Cummins ISX motor. I don't know if there are any diesel techs or air conditioning people here but maybe someone can help. :) Anyhow, the air conditioning system freezes up CONSTANTLY. Humid or dry, cool or hot. It cools OK for a while and then we notice it's not blowing air anymore, we shut off the fan or the compressor and it thaws out.
