~~Abstract The table below provides the system requirements for IBM WebSphere Application Server v8.5 Express in different levels and organization of detail. This document describes the minimum product levels that need to be installed before opening a problem report with the WebSphere Application Server Support team.~~

~~System Requirements for WebSphere Application Server ...~~

~~use. To an application server, any application, even one written by IBM, is still an application and could have user data. The thought was that IBM-written applications might want to put their own information into the WebSphere SMF records and this gave us a way to do it without colliding with any customer/vendor usage of the user data API.~~
