There's been a curious upsurge in interest about the afterlife lately, but we're too often limited in our concept of heaven. The reality is we all do have questions about heaven: What does a resurrected person look like? What does a resurrected earth look like? Do we get our heart's desire in heaven? In What on Earth Do We Know about Heaven?, Randal Rauser considers twenty thought-provoking questions, each of which winds back to the core concept of heaven: what it is and what it isn't. Rauser uses Scripture to remind us that God's ultimate purpose is that the whole creation will be transformed and renewed, guiding readers through a vision of a glorious afterlife, consisting of a perfected earth, perfected bodies, perfected human culture, and perfected relationships.

A surprising call to action from a key business and environmental player at the dawn of the millenium. From the Report to the Shareholders, Earth Inc., dated January 1, 2030 that begins Where on Earth Are We Going?: world hunger, ecological and environmental disaster, global warming, massive shifts in weather systems, the re-emergence of diseases long thought controlled, and political turmoil in a world where a barrel of water is more expensive than a barrel of oil. Hard-headed, practical, impassioned, this is a call to action by a key business and environmental leader at the end of the twentieth century that cannot be ignored. To explain how he came by his beliefs, Maurice Strong chronicles his poverty-stricken beginnings as a child in the prairies during the Depression to his appointment as President of Power Corporation at 29, his appointment as Undersecretary of the United Nations at 40, and on the domestic front, as Chairman of Ontario Hydro.

This lively collection of fascinating facts and fables, colorful cartoons, and dynamic illustrations explains how everything on Earth is connected. Since its original publication, concern for the environment has grown, and although environmental damage has increased, so too have "green" strategies. This new edition reflects these changes, with expanded discussion of environmental issues and new technologies, as well as many more activities. New sidebars offer extra facts, tips, and real-life examples of things other budding ecologists have done to make the world a better place.
